David Arturo Arroyave Pérez

Full-Stack Developer
Manizales, Colombia | Open to remote, hybrid and on-site work
Email: davidxap@gmail.com | GitHub: https://github.com/Davidxap | LinkedIn: https://www.linkedin.com/in/davidxaperez

SUMMARY

Full-Stack Developer who delivers web applications end to end, from the first client conversation and data modeling to production, with tests and documentation. Daily stack: TypeScript, React, Next.js, Node.js and Python, with PostgreSQL. I work well in teams (ticketed pull requests, code review, shared Git workflows), care about quality habits such as automated tests, CI checks and accessibility, and learn constantly: currently AWS and AI-assisted development with Claude Code and OpenCode. I share what I learn, including a free book-style site, in Spanish and English, on how JavaScript works.

SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), Python, HTML5, CSS3, Bash
- **Frontend:** React, Next.js, Astro, Vite, Tailwind CSS, i18n (English and Spanish), WCAG accessibility
- **Backend:** Node.js, Express, FastAPI, Django, Go, REST API design, JWT authentication, OOP
- **Data:** PostgreSQL, Prisma ORM, Supabase; working knowledge of MongoDB
- **Testing & Quality:** Vitest, Playwright, unit and integration testing, code review, technical writing
- **DevOps & Tools:** Git, GitHub, GitHub Actions, CI/CD, Docker (local development), Linux, Vercel, Cloudinary
- **AI-assisted development:** Claude Code, OpenCode, AI agent workflows
- **Learning:** AWS (studied official AWS training material; certification pending), product engineering focused on AI-assisted development

EXPERIENCE

Freelance Full-Stack Developer, Remote | 2025 – Present

- Deliver full-stack web applications for clients, from requirements and data modeling to production deployment on Vercel.
- Build REST APIs with FastAPI and Next.js and integrate PostgreSQL and Supabase databases.
- Automate client operations with Python and Bash scripts (reporting, backups, data collection).
- Write the technical documentation that ships with each project and report progress directly to clients.

Team Project, AmplixMe Acceleration Program (FS-0009) | Jul 2026 – Aug 2026

Training-program team project (not employment), 7 contributors.

- Developed features with Node.js, Express, Prisma, PostgreSQL and React through about 20 merged, ticketed pull requests.
- Implemented JWT login, Cloudinary image upload, CRUD pages, search, sort and filter, and a database seed script.
- Worked in a ticket-and-review workflow with a team, using Git and pull requests.

Freelance, Digital Marketing Campaigns | 2020 – 2024

- Worked on digital marketing campaigns for small-business clients: content strategy, platform management and metrics reporting.
- Learned to translate business needs into clear requirements, a skill I now apply to software projects.

PROJECTS

TCG Store | Next.js, TypeScript, PostgreSQL, Prisma, Supabase, Vitest, Playwright

- Designed and built an advanced trading-card store demo end to end (paused): a PostgreSQL data model of 31 Prisma models, catalog synced from an external API, admin panel with Cloudinary media management, deck builder and a UI in English and Spanish.
- Live demo: https://tcg-store-sage.vercel.app

IKAI Shell | QML, Quickshell, Shell, Python

- Built a Control Center, widgets and icon-generation scripts for a Linux desktop shell (public beta v0.2.0), with contrast checks per theme. The bar engine is a fork of Shibumi-Shell by HANCORE (MIT), credited in the repository.
- Source: https://github.com/Davidxap/ikai-shell

omarchy-zen | Open Source, CSS, Shell, Python

- Maintain an Omarchy plugin that syncs the system theme into the Zen browser with CSS only and WCAG AA contrast enforcement. Approved and verified in the official Omarchy plugin marketplace; current version 1.4.2 with merged external contributions. Started from zen-auto-style by Gregory Strand (MIT, credited).
- Source: https://github.com/Davidxap/omarchy-zen

JavaScript para Subir de Nivel | Astro, Starlight, i18n, GitHub Actions

- Wrote and published a free learning site, in Spanish and English, on how JavaScript works, in twelve chapters with exercises, deployed with GitHub Actions to GitHub Pages.
- Read it: https://davidxap.github.io/javascript-para-subir-de-nivel

obsidian-backend-template | AI-assisted development

- Created a backend template with a dashboard of AI agent logs in Obsidian to follow agent workflows.

Open Source Contributions | AWS User Group Manizales, Skorify

- Contributed 2 merged pull requests to Skorify, an AWS User Group Manizales team project (users module with i18n, played-matches view).

EDUCATION

Information Systems Technologist, Universidad de Caldas, Manizales, Colombia | 2023 – 2025

LANGUAGES

Spanish: native | English: B2

COMMUNITY & LEARNING

- Attend AWS User Group Manizales meetups.
- Studied official AWS training material; certification pending. Learning AI-assisted development.
- Interests: reading, PC video games, technology, sport, art and design, coffee.
